Grounding connection is obtained by contact surface between starter and Flywhell housing, clean this surface contact to confirm ground connectivity.
When you install "No (B- / E) terminal starter type" in old version, please remove or insulate Ground cable to avoid any risk of contact with Positeve Terminal around (Starter SW and environmentl parts)

The starters with (B- / E) Terminal Starter and No (B- / E) Terminal Starter are inter-changeable.

La conexión a masa se obtiene a traves de la superficie de contacto entre el arranque y la carcasa del volante motor, limpie la superficie para que pueda haber una buena conexión a masa.
Cuando instale el nuevo motor de arranque (sin terminal B- / E), retire y aisle el cable de masa para evitar cualquier riesgo de contacto con el terminal positivo o el entorno.

Los motores de arranque con y sin (B- / E) terminal son intercambiables.

La mise à terre est obtenue par la surface de contact entre le démarreur et le carter de volant moteur, bien nettoyer cette surface pour confirmer un bon contact à terre.
Lorsque vous installez le nuveau demarreur (sans borne B- / E) par l`ancienne version, veuillez retirer et isoler le fil de mise à terre pour éviter tout risque de contact avec la borne positive et l`environnement.

Les démarreurs avec et sans borne (B- / E) sont interchangeables.
